## Career objective

---

Team player with adequate social skills and strong troubleshooting skills looking to expand my knowledge of software design and technology.

## Education

---

**Bachelor of science:** Computer Science, 2019

**CUNY, College of Staten Island-** Staten Island / NY

**Relevant coursework:** Software Engineering, Software Design, Data Structures, Analysis of algorithms, Database Systems, Web Development, Computer Game Programming

## Skills

---

**Programming languages:** c++, Python, C#, JavaScript, HTML, CSS, SQL

**Technologies:** Bootstrap, Django, PyCharm, AWS Cloud9 EC2, GitHub, Git.

## Experience

---

**Barista** April 2015 – currently employed

Starbucks - Staten Island, NY

- Maintaining adequate communicative / cooperative skills while remaining calm. serving hundreds of customers per day while making sure their individual needs are met.
- Responsible for training several new Baristas starting out the job.

## Projects

---

**Space Shootout** - developed a 2d shooting gallery Unity game Where the player attempts to shoot as many enemy spaceships as possible to achieve a high score.

**Django web project** – Developed a full-stack website using Django web framework. Implementing SQL lite database, html, CSS, JavaScript. Currently the project works as a playground where I can learn more about how request handling works along with the model template views paradigm of Django.

**Insertion sort / merge sort analysis** – wrote a project in python that performs insertion and merge sort on a set of randomly generated numbers to collect data and analyze in which cases which algorithm had the best performance.

**Django Blog Project** – Django Web application that serves as a blog. A user can Create, Read, Update, and Delete posts. Users can also leave comments on the posts, which are then approved or denied for publication.

## Hobbies / Interests

---

Pianist, Computer Repair, Hiking, Biking, Meditation, Skateboarding
